AIMS AND SCOPE

Acta Orthopaedica et Traumatologica Turcica (AOTT) is an international, scientific, open access periodical published in accordance with independent, unbiased, and double-blinded peer-review principles. The journal is the official publication of the Turkish Association of Orthopaedics and Traumatology, and Turkish Society of Orthopaedics and Traumatology. It is published bimonthly in January, March, May, July, September, and November. The publication language of the journal is English.

The aim of the journal is to publish original studies of the highest scientific and clinical value in orthopedics, traumatology, and related disciplines. The scope of the journal includes but not limited to diagnostic, treatment, and prevention methods related to orthopedics and traumatology. Acta Orthopaedica et Traumatologica Turcica publishes clinical and basic research articles, case reports, personal clinical and technical notes, systematic reviews and meta-analyses and letters to the Editor. Proceedings of scientific meetings are also considered for publication.

The target audience of the journal includes healthcare professionals, physicians, and researchers who are interested or working in orthopedics and traumatology field, and related disciplines.

Acta Orthopaedica et Traumatologica Turcica is currently indexed in Web of Science-Science Citation Index Expanded, PubMed/Medline, PubMed Central, Scopus, DOAJ, TUBITAK ULAKBIM TR Index.

The editorial and publication processes of the journal are shaped in accordance with the guidelines of the International Committee of Medical Journal Editors (ICMJE), World Association of Medical Editors (WAME), Council of Science Editors (CSE), Committee on Publication Ethics (COPE), European Association of Science Editors (EASE), and National Information Standards Organization (NISO). The journal is in conformity with the Principles of Transparency and Best Practice in Scholarly Publishing (doaj.org/bestpractice).

All manuscripts must be submitted via the online submission system, which is available at www.aott.org.tr. The journal guidelines, technical information, and the required forms are available on the journal’s web page.

Expenses of the journal are covered by the article processing charges and the financial support received from the Turkish Association of Orthopaedics and Traumatology and the Turkish Society of Orthopaedics and Traumatology. Potential advertisers should contact the Editorial Office. Advertisement images are published only upon the Editor-in-Chief’s approval.

Statements or opinions expressed in the manuscripts published in the journal reflect the views of the author(s) and not the opinions of the Turkish Association of Orthopaedics and Traumatology, editors, editorial board, and/or publisher; the editors, editorial board, and publisher disclaim any responsibility or liability for such materials.

All published content is available online, free of charge at www.aott.org.tr.

Turkish Association of Orthopaedics and Traumatology holds the international copyright of all the content published in the journal. The journal’s content is licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License (CC BY-NC-ND 4.0).

Yan Ding, Shiqiao Lu, Shengjie Dong, Jinpeng Cui, Zhilin Cao, Yunzhen Chen
258  Minimal invasive surgery in the management of intra-articular calcaneal fractures: A retrospective comparison of screw fixation alone versus screw with small locking plate fixation techniques
Narutchai Chotikkakamthorn, Apisan Chanajit, Theerawoot Tharmviboonsri, Bavornrit Chuckpaiwong, Thos Harnroongroj

265  Efficacy of calcium phosphate cementing in the surgical treatment of Sanders Type II and III calcaneal fractures using screw fixation with sinus tarsi approach
Cemil Kayah, Fırat Ozan, Taşkin Altay, Hüseyin Gökhan Karahan, Kamil Yamak, Soner Özdemir

Technical Note

271  Anterior horizontal rafting plate to treat complex osteoporotic tibial plateau fractures: a technical note
Jian-Jian Shen, Jian-Sheng Qian, Jun Zhang, Jie-Feng Huang

Case Reports

277  Post-traumatic double crush pudendal nerve entrapment syndrome after fracture of the pelvis: A case report
Ömer Ayık, Erol Kozanoğlu, Yavuz Önol, Hayati Durmaz

281  Bilateral brachial artery infiltration by tumoral calcinosis: A case report
Ali Cavit, Sercan Çapkan, Kutay Yılmaz, Tufan Kaleli
FROM THE EDITOR

Dear AOTT readers,

Looking back to last issue, “Effects of tamoxifen therapy on sciatic nerve crush injury: An experimental study in rats, by Akar et al” and “Effect of malpractice claims on orthopedic and traumatology physicians in Turkey: A survey study, by Dirvar et al.” were the leading articles in terms of “read and download”. Interestingly case reports are always in the top five “read and download” type of articles. Due to the journal’s limited space editors of AOTT have been very selective in accepting case reports, and I must admit it will be as such in the near future. Although case reports are considered as level V evidence in the level of evidence taxonomy, they are among the most read and referred to articles in daily practice.

Bignall, clearly states in Lancet paper as “case reports have historically been important in (a) recognizing new, rare and unknown diseases, (b) evaluating therapeutic effects, adverse events, surveillance and costs of interventions and (c) improving problem-based medical education”.

In 2013, Consensus-based Clinical Case Reporting Guideline Development (CARE) were developed to improve the quality and completeness of a case report thus a CARE guideline was published. I would recommend authors willing to submit case reports, strongly adhere to CARE guidelines. Furthermore, AOTT will be ready to accept short video clips as a supplement to case reports.

In this issue of AOTT, I am sure you will find interesting articles to read and download.

Haluk Berk MD
Editor-in-Chief
Acta Orthopaedica et Traumatologica Turcica
